Subject: Lord Shope RD/RA Annual Progress Report

Dear Mr. Turner:

Lord is hereby submitting five copies of the annual progress report for 1995.

The following work was conducted during this period:

- The Remedial Design was completed and Remedial Action subsequently commenced in late 1994 with installation of the discharge line by the contractor, Dames and Moore.
- The ISVS aboveground piping, extraction wells and temperature probes have been installed.
- The treatment building has been constructed and controls and utilities are nearly complete.
- Groundwater treatment equipment has been installed in the treatment building. All wells for extraction and monitoring on Lord property have been installed or are in the process of being installed.
- Lord still does not have access to Over Lake property. USEPA was notified in late 1994 of the access problem. Lord has now advised USEPA of force majeure because of the access issue. The project will not be completed on schedule and this issue must be resolved before completion in 1996. Lord will proceed to complete all phases of the project located on our property in the interim.
